**Maharashtra Pollution Control Board**

## *Annexure-1*

### **Roles and Responsibilities of positions under the State Climate Action Cell**

#### **1. Climate Finance Expert**

- 1) Establish and lead a State Climate Finance unit under the State Climate Action Cell.
- 2) Identify international, national, and regional finance instruments and mechanisms and also pursue funding opportunities from various sources, including international climate funds, development banks, national and state schemes, private investors, and philanthropic organizations.
- 3) Stay informed about national climate policies, regulations, and international agreements related to climate finance. Closely follow and analyse national climate finance policies including national Carbon Credit & Green Credit frameworks, Green Bonds, Eco-mark certification, etc
- 4) Conducting financial assessments of state's climate-related projects and initiatives to determine their feasibility and potential for attracting funding.
- 5) Help develop and implement strategies to attract public and private investments in climate-mitigation & adaptation projects, technologies, and innovations.
- 6) Collaborating with stakeholders, such as state government's departments, urban & local bodies and all state government owned entities, financial institutions, to enhance their understanding of climate finance mechanisms and build their capacity to access and manage climate funds effectively.
- 7) Promoting the development and uptake of green financial products, such as green bonds, climate-focused insurance, and sustainability-linked loans, to channel funds towards sustainable and climate-resilient projects
- 8) Ensuring compliance with reporting requirements for climate finance projects, both to donors and regulatory bodies. This involves measuring and reporting on the environmental and social impacts of funded projects.
- 9) Assessing climate-related risks and integrating them into financial decision-making processes. This includes evaluating the physical risks associated with climate change and the transition risks stemming from shifts to a low-carbon economy.
- 10) Provide climate finance-based expertise in development and implementation of various climate change action plans, strategies, and projects to state departments, urban & local bodies and all state government owned entities.

#### **2. Consultant/ Project Officer**

- 1) Develop, implement & manage national and state strategies, plans and projects aimed at mitigating climate change, climate resilience, or promoting sustainability.
- 2) Align various State projects with broader environmental and climate change strategies at local, regional, or global levels.
- 3) Collaborate with relevant government departments & agencies (including Urban & Local bodies), non-governmental organizations (NGOs), community groups, knowledge partners and other stakeholders.
- 4) Assist in the development and on-field implementation of environmental and climate change policies, strategies, and action plans.
- 5) Hold effective communication and engage with stakeholders to gather inputs, address concerns, and build consensus on environmental and climate-related initiatives.
- 6) Promote sustainable practices and encourage the adoption of climate and eco-friendly initiatives in various climate relevant sectors like energy, agriculture, transportation, housing, water and urban planning.
- 7) Raise awareness about climate change impacts and solutions through educational campaigns and public outreach activities.
- 8) Conduct research on emerging environmental technologies and climate innovations and help them pilot and replicate across the state.
- 9) Engage with national and international organizations, forums and represent the State at various regional, national & international conferences to stay connected with the global environmental and climate change community.
- 10) Cooperate, associate, and help streamline state knowledge management platforms.
